QUESTION 1

Read the cloze passage. Using the word bank, drag and drop the correct word in each blank that makes sense in the passage.

Oil **Natural Gas** **Coal** **Nuclear** **Hydro Electric** **Renewables**

31% 24.4% 26.9% 4.3% 6.8% 6.7%

Source: bp Statistical Review of World Energy, 2022.

Suggested Response

We use **energy** in mostly three ways: to make **electricity**, to **transport** ourselves and products, and to make **heat**. 82% of global energy comes from **fossil fuels** - coal, oil, and natural gas. **Hydroelectric** makes up about 7% of global energy. 4% comes from **nuclear** energy. **Solar**, wind, geothermal, biomass are **grouped** with other sources to make up about 7% of global energy.
