Summary 15:00m

QUESTION 1

Using the word bank, drag and drop the correct word in each blank to make a summary statement.

[] continue to [] []
of the [] energy that is used for electricity and
[], while [] energy, nuclear energy and
[] (a []
composed of solar, wind, geothermal, biomass and other sources) each account for
[] than [] of the global
[] [] and are used for electricity and
[] (biomass only).

7% energy fossil fuels
global grouping heat
hydroelectric less mix
most provide renewables
transportation

Suggested Response

Fossil fuels continue to provide **most** of the **global** energy that is used for electricity and **transportation**, while **hydroelectric** energy, nuclear energy and **renewables** (a grouping composed of solar, wind, geothermal, biomass and other sources) each account for a **less** than **7%** of the global **energy mix** and are used for electricity and **heat** (biomass only).
